

PSR SUITE

Camera tracking
Driver PSR

PSR CONFIGURATEUR

- Early definition of the deployment strategy (number of radars, location, properties).
- Customisation of surveillance depending on the site (detection zones, exclusion zones, etc.).
- Radar installation and synchronisation.
- Site study option: addition of obstacles, simulation of coverage and intrusion trajectories

PSR VIEWER

- To view intrusions and equipment status in real time (audible and visual alerts).

PSR SERVEUR

- H24 operation
- Multi-radar fusion.
- Can be integrated with third-party systems with :
 - system configuration (zones, radars, etc.)
 - system status (status of radars, etc.)
 - real-time alerts (position, direction, age, etc.) CSS add-on
- Camera control on multiple alerts (Onvif), compatible with VMS (Video Management System) compatible.

PSR INVESTIGATEUR

- A posteriori analysis of long operating periods..
- Analysis of false alarm rate.
- Allows alerts to be replayed for analysis and detection of various security flaws on the site under surveillance.
